

ICU Drugs	Mechanism of interference
Glucocorticoides	TSH suppression, inhibition of peripheral conversion
Iodinated contrast agents, iodine wound dressings	Inhibition of hormone synthesis and secretion in thyroid gland
Propranolol	Inhibition of peripheral conversion
Amiodarone	Inhibition of peripheral conversion
Barbiturates	Increased T4 clearance
Dopamine	TSH suppression
Opiates	TSH suppression
Benzodiazepines	Inhibition of peripheral conversion
Sulfonamides	Inhibition of hormone synthesis
Somatostatine	TSH suppression
Furosemide	Interaction with serum binding proteins
